

**FAASTeam presents:**

## **Destination: Yellowstone**

Cross-country flight is often scenic, but especially so when your flight plan takes you to Yellowstone National Park, widely known as the first national park in the world. Established by Congress and signed into law by President Ulysses S. Grant, Yellowstone is known for its wildlife, its sub-alpine forest, and its many geothermal features, especially Old Faithful Geyser. In this Destination seminar, we focus on the highlights of flying in and around Yellowstone National Park. Extensive training and planning is necessary to achieve the rewards of sweeping aerial views and successfully tackling those challenging high altitude airports. We will discuss pre-trip training, emergency preparedness, route planning, weather considerations, safe flying through mountain passes, as well as what to do once you reach your destination. Sightseeing by air is a common pastime among pilots, but special care should be taken when sightseeing over popular destinations, especially those with protected wildlife and nature areas. This seminar is presented by a team of pilots and CFIs who will soon embark on a six-day trip through Yellowstone, Wyoming, Idaho, and Oregon, and will include photos and stories of their flights when they last made this journey. More information will be available about the trip,

## Event Details

**Sat, May 3, 2014 - 12:00 pm**

**San Carlos Flight Center**

655 Skyway Rd

Suite 215

San Carlos, CA 94070

**Contact: San Carlos Flight Center**  
**(650) 946-1700**
